

RMG GPS TRACKER

COMPACT, ROBUST AND HIGH-PERFORMANCE

RMG, Adambi's GPS tracker, turns every container into a trackable object.

High-precision geolocation and reliable data transmission enable you to:

- Optimise logistics
- Detect unauthorised movements
- Detecting and reporting tampering

IP67 certified, it guarantees operational continuity even in harsh environments.

Installation is simple and **compatible with any type of container.**

It is available with an **anti-tampering** system to detect any unauthorised tampering.

Communication using LPWAN technology ensures **wide coverage and low power consumption.**

Data is accessible via an **ASP** platform or **API**, for full integration into existing management systems.

WITHOUT A TRACKING SYSTEM

- Location monitoring via on-site checks
- Manual location tracking only
- No updates on container locations
- High risk of theft or loss
- Difficulty in reconstructing events

VS

WITH RMG GPS TRACKER

- Precise and up-to-date geolocation
- Automatic updates on container locations
- Reduced search times
- Alerts in the event of tampering (Optional)
- Historical data available on the platform

Why integrate the RMG GPS into your fleet?

➤ Reduced operating costs

➤ Location tracking

➤ Improved planning

➤ Optimised container recovery

Ideal for:

- Waste management companies
- Multi-utility companies
- Container hire companies
- Industrial plants
